What is new in the project?

CirCLER: From Foundational Knowledge to Future Skills for the Circular Transition

The CirCLER training toolkit supports the entire learning pathway of future Circular Economy Transition Managers (CETMs), starting from the fundamental principles introduced in the first module (M1) and moving towards strategic reflection and future perspectives developed in the final module (M10). As the opening and closing modules of the training programme, M1 and M10 help structure a comprehensive pathway that supports learners in understanding the challenges of circularity and in translating knowledge into concrete actions within the furniture sector.

From regulation to action: advancing through Modules 2 and 3 of the CirCLER Training Course

The CirCLER Training Course begins with a deep dive into EU sustainability regulation, ensuring that learners first gain a solid understanding of the rules shaping Europe's transition to a circular economy.

Circular Business Models and Circular Design

Modules 4 and 5 of the CirCLER Training Course
(<https://circlercourse.eu/>)

The focus of Module 4 (Circular Business Models) is about strategically rethinking how value is created and retained in the industry — not just recycling, but redesigning the business itself.

Sustainable Materials & Key Technologies: Discover Modules 6 and 7 of CirCLER

Modules 6 and 7 of the CirCLER Training Course (<https://circlercourse.eu/>)

As the furniture industry moves towards circularity, the Circular Economy Transition Manager (CETM) programme from CirCLER equips professionals with the skills to lead this transition. The programme covers key dimensions of the circular economy, from regulation and design to materials and digitalisation. This news focuses on Modules 6 and 7, which connect sustainable material choices with advanced technologies to enable truly circular furniture solutions.

Manufacturing Processes and Transition Strategy towards the Circular Economy

Modules 8 and 9 of the CirCLER Training Course (<https://circlercourse.eu/>)

Module 8 "Manufacturing Processes" focuses on understanding and transforming production systems to align operational efficiency with circular economy principles, integrating sustainability into daily industrial practice rather than treating it as a separate or secondary objective. The module examines how manufacturing can evolve from linear production patterns towards more resource-efficient and regenerative models within the furniture sector.
