

## ■ THE MACHINING CENTER WITH THE INTELLIGENT MAGAZINE

This is a “full-option” solution designed to provide door and window manufacturers with excellent performance. Woodpecker Performance is equipped with an intelligent magazine that allows to load from 400 up to 1,200 workpieces.

Thanks to the multiple clamp system, up to 10 pieces can be processed simultaneously, depending on the size of the piece. Furthermore, with its five independent electro-spindles it is able to deliver high power for any machining operation. Another distinctive feature of this machine is its 256-slot linear tool magazine, which can hold up to 500 tools.

The Woodpecker Performance machining center can operate autonomously for up to 8 hours a day, without the need for an operator, responding to the difficulties of finding qualified personnel. It is capable of producing from 20 to 80 windows per day in double shifts.

The Performance offers a number of options, including an ultrasonic bath for automatic tool washing, to ensure longer tool's processing life. Its compactness is another feature that sets it apart from other solutions on the market.

It occupies a truly minimal space on the factory floor. We can safely say that we are the only ones to have a machine with such productivity levels and such a small overall size.

## ■ INTERIOR DESIGN TRENDS FOR 2024

As we step into the exciting realm of 2024, the world of interior design is undergoing a captivating transformation, ushering in innovative concepts and cutting-edge aesthetics.

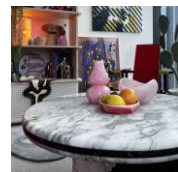

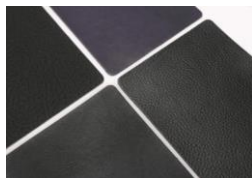

**Sustainable chich.** A good example of a merge between sustainable production and sustainable materials is Leap®. The next gen material is used for furniture upholstery, home items and automotive industry.

**Biophilic design.** Biophilic design, which integrates natural elements into the built environment, is gaining popularity.

**Artisanal craftsmanship** in an age of mass production, there is a growing appreciation for artisanal craftsmanship.

**Curvilinear shapes** bid farewell to straight lines and sharp edges as curvilinear shapes take over interiors in 2024!

**Maximalism with a twist** while minimalism has dominated design trends in recent years, this year is bringing a fresh take on maximalism.
